

Hansen Fire & Safety

Manufacturer and Master Distributor to Dealers Worldwide

A new generation of protection...

	Competitor's Carbon	FireCraft® Carbon Hood
Fit	Smaller sized, tighter fitting, hoods, which can trap heat. Heat stress is the #1 reason that firefighters go down!!	Generous sizing results in less fabric stretch and greater structural stability – wider hood construction provides superior air circulation and cooling
Moisture Management	Inferior moisture wicking and breathability	Greater water vapor transfer for excellent moisture wicking and breathability
Shrinkage & Lint	“Pilling” is a major complaint with competitor's carbon products	Material finish minimizes shrinkage and results in no “pilling”.
Material Composition	Made with original 1st-generation materials	4th Generation Carbon Technology with advanced fiber blend – unsurpassed test results in Fire, Molten Metal, ARC Flash and Flash Fire

FireCraft® Carbon Hoods provide the highest level of protection in the protective apparel industry and are brought to you by Hansen Fire & Safety. **FireCraft® Carbon Hood** fabrics are lightweight, offer excellent moisture wicking and are manufactured with enhanced dimensional stability to maintain their shape.

FireCraft® Carbon Hoods offer more square inches per style than any other hood on the market. More square inches means more protection. Plus, this generous fit allows for less fabric stress and overall superior air circulation.

FireCraft® Carbon Hoods address both protection and comfort; the technology behind these hoods is unparalleled. You'll never again have to sacrifice the personal protection you deserve for the comfort you desire.

Item#: Hd-C6 [standard length] **Hd-C6-FL** [flared long]
